MOHAMMED TAWHEED

Red Team Analyst | Penetration Tester | CEH

+91-9980412233 | mohammedtawheed9317@outlook.com | Portfolio

SUMMARY

Junior Red Team Analyst and Penetration Tester with 2+ years of cybersecurity experience, including 1 year of hands-on penetration testing across web applications, networks, and infrastructure environments. Certified Ethical Hacker (CEH) with experience in vulnerability assessment, reconnaissance, attack-path analysis, and security testing. Skilled in identifying and validating security weaknesses, mapping findings to MITRE ATT&CK, and preparing clear remediation reports. Previous SOC experience with Splunk, QRadar, log analysis, and network monitoring provides a strong understanding of both attacker and defender perspectives.

KEY ACHIEVEMENTS

- Executed 20+ penetration testing assessments across web, network, and infrastructure targets.
- Discovered and validated 50+ security findings, including multiple High and Critical vulnerabilities.
- Reduced false positives through effective vulnerability validation and exploit testing.
- Supported investigation of 30+ security incidents and alerts using enterprise SIEM platforms.

TECHNICAL SKILLS

- **Penetration Testing**: Network and web application penetration testing, red team assessments, reconnaissance, enumeration, attack-surface mapping, attack-path analysis, vulnerability validation
- **Tools**: Nessus, Wireshark, Splunk, IBM QRadar, Security Onion
- **Security**: TCP/IP, DNS, VPN, firewalls, IDS/IPS, SIEM, EDR, phishing analysis, IOC analysis, incident investigation
- **Frameworks and Scripting**: MITRE ATT&CK, Python, Bash, PowerShell

CERTIFICATIONS

- **EC-Council Certified SOC Analyst (CSA)** - ECC8120457369
- **EC-Council Certified Ethical Hacker (CEH)** - ECC0562384197
- **EC-Council Certified Cloud Security Engineer (CCSE) –** ECC1275908436
- **EC-Council Certified Threat Intelligence Analyst (CTIA) –** ECC3476985012

EXPERIENCE

Red Team Analyst | HashSlash *February 2024 – Present*

- Conducted authorised penetration tests and red team assessments across network, infrastructure and web application targets within agreed scope and rules of engagement.
- Performed reconnaissance, asset discovery, service enumeration and attack-surface mapping to identify exposed services and likely entry points.
- Validated exploitable weaknesses and separated actionable issues from false positives to demonstrate real security impact.
- Built and analyzed attack paths from initial access toward target objectives and mapped adversary behaviour to MITRE ATT&CK.
- Used Nessus for supporting vulnerability scanning and Wireshark for traffic analysis; reviewed service configurations and controls for misconfigurations.
- Produced evidence-backed reports covering scope, methodology, proof of concept, severity, business impact and prioritised remediation.
- Briefed technical stakeholders, supported remediation prioritisation and retested fixes to confirm closure.

Cyber Security Intern | Andy Infosec *January 2023 - January 2024*

- Monitored and validated SIEM alerts using Splunk, IBM QRadar and Security Onion, following standard SOC procedures.
- Investigated phishing emails and malicious URLs; supported incident response and vulnerability assessment activities.
- Analyzed authentication logs, firewall events and packet captures to detect suspicious activity and support threat investigations.
- Prepared investigation notes and security reports with senior analysts.

PROJECTS

SOC Log-Based Threat Detection System | Python | GitHub

- Built Python automation to detect brute-force login patterns and generate analyst-ready alerts mapped to MITRE ATT&CK.

Automated SOAR Incident Response System with MITRE ATT&CK | Python | GitHub

- Built an automated incident response workflow for IP blocking, host isolation simulation, MITRE context, and structured reporting.

SIEM AI Agent | Security Dashboard

- Developed a security dashboard to automate alert generation, risk scoring, MITRE ATT&CK enrichment, and SOC triage

EDUCATION

Bachelor of Engineering, Computer Science Engineering | BMS Institute of Technology & Management | Bengaluru, India
